PROFESSIONAL SUMMARY

Full-Stack Developer and AI Tooling Architect with 4 years of experience building production-grade web applications and AI-integrated portfolio platforms for international clients. Founded and operates Wizards Webcraft, the portfolio development department at Careers Without Borders, setting infrastructure standards, delivery methodology and output quality across 17 service departments. Introduced the Deluxe Portfolio tier, the organisation's first custom Next.js portfolio product deployed on Vercel and has delivered 170+ professional portfolios with a documented 60% job interview success rate across clients in Africa, Europe, and beyond. Currently building multi-agent AI systems using LangGraph, CrewAI and the Anthropic API, with 10 Anthropic Academy certifications and 5 custom Claude Cowork plugins operating in active production use. Seeking to apply full-stack engineering and agentic systems expertise to a Senior Developer or AI Engineering role at a remote-first technology organisation.

SKILLS

Prompt Engineering, Agent Orchestration, Full-Stack Development, Next.js Development, API Integration, Portfolio Architecture, Plugin Development, Subagent Design, Security Auditing, MCP Integration, TypeScript Development, Vercel Deployment, Supabase Integration, LangGraph Development, Code Auditing, Technical Documentation, Content Strategy, SEO Optimisation, Claude Code, Dual-Purpose Design, React Development, Headless Architecture, Database Management, Domain Migration, Performance Optimisation, Framer Motion, Version Control, Client Consultation, Workflow Automation, Agentic Systems

PROFESSIONAL EXPERIENCE

Senior Portfolio & Software Developer

Careers Without Borders | Remote | October 2024 - Present

Roles And Responsibilities:

- Founded Wizards Webcraft, the internal portfolio development department at Careers Without Borders, defining technology infrastructure, delivery standards and evidence-based content methodology across 17 service departments.
- Introduced the Deluxe Portfolio tier, replacing static Wix templates with custom-coded Next.js portfolios deployed on Vercel: the organisation's first full-stack portfolio product, architected to function simultaneously as a job-seeking tool and a freelance brand platform, expanding client earning potential beyond salaried employment.
- Delivered 110+ professional portfolios under the Careers Without Borders brand using a consistent structured methodology: bolded metrics, multi-phase case studies and UK English first-person confident voice, achieving a 30% increase in client success rates.
- Conducted a full security and architecture audit of the CWB company website, identifying critical vulnerabilities including live credentials committed to a public GitHub repository, SPA and SEO structural failures and absent email capture infrastructure, and produced two prioritised remediation reports with actionable roadmaps.
- Automated portfolio production workflows using Claude API prompt engineering and Antigravity, cutting average build time by 20% and maintaining personalisation quality at scale across international client engagements.
- Grew service demand by 25% through consistent client outcomes, with multiple clients securing target remote roles and generating referral business within 90 days of portfolio launch.

- Coordinated distributed client-facing delivery across multiple time zones, managing portfolio handoffs, quality reviews and cross-team communication through structured asynchronous digital workflows.

Freelance Full-Stack Developer

Independent | Remote | January 2024 - Present

Roles And Responsibilities:

- Rebuilt Basquiat Capital's website (basquiatcapital.com) from the ground up in Next.js, Tailwind CSS, and Framer Motion, completing a zero-downtime domain and hosting migration for this institutional investment and capital advisory firm.
- Developed and deployed 5 custom Claude Cowork plugins (Content Generator, Deluxe Portfolio Studio, Portfolio Review Generator, Code Intelligence Audit and Client Report Formatter), all in active production use across the CWB portfolio workflow, cutting manual effort by approximately 30%.
- Designed and maintained AI-assisted production workflows using MCP-compatible tooling and prompt engineering, automating multi-step content generation, security auditing and client reporting processes.
- Pursued a structured self-directed curriculum in AI automation and multi-agent systems, working across the Anthropic API, OpenAI API, LangGraph and CrewAI as part of an independent AI engineering practice.
- Completed 10 Anthropic Academy certifications over 2 months, spanning Claude fundamentals, Claude Code, Model Context Protocol (introductory and advanced), subagents, agent skills, Claude Cowork and AI fluency frameworks.
- Managed end-to-end project delivery across international client engagements as a sole practitioner, handling design, development, client communication and post-launch support without external resources.

Portfolio & Software Developer

Pro Resume Crafters (now Careers Without Borders) | Remote | November 2023 - September 2024

Roles And Responsibilities:

- Designed and delivered 50-60 professional portfolios tailored to international client specifications across multiple countries, achieving a 60% job interview success rate.
- Led full-stack development of the GHC Foundation website, integrating PayPal donation infrastructure and on-page SEO, producing a 40% increase in engagement.
- Built and launched the organisation's official website, establishing the brand's digital presence and supporting client acquisition across a remote-first market.
- Secured and optimised client websites through targeted performance and security reviews, reducing average site downtime by 25%.
- Conducted structured virtual consultations to translate client career goals into actionable portfolio briefs, informing design, content and technical build decisions.
- Established the content standards and delivery templates that later formed the foundation of the Wizards Wecraft methodology at Careers Without Borders, ensuring quality consistency across all client outputs.

Trade Development Representative

YDX Agency Ltd | Nairobi, Kenya | December 2022 - May 2023

Roles And Responsibilities:

- Expanded Safaricom product market coverage by 15% through targeted retail partnerships and structured account development across high-value trade zones.
- Trained retail partners on new product lines, improving field-level product knowledge and promotion effectiveness across the assigned territory.
- Maintained a 100% compliance audit rating across all KYC and regulatory documentation requirements.
- Provided technical and operational field support to retail partners, diagnosing store-level issues and coordinating resolution within agreed timeframes.

IT Assistant

Mountain View School | Nairobi, Kenya | February 2018 - August 2018 & May 2022 - July 2022

Roles And Responsibilities:

- Administered the school ERP software, managing system access for staff and resolving operational issues within 24 hours to minimise disruptions.

- Deployed and configured computer station infrastructure, expanding technology access to over 200 users across the school campus.
- Integrated digital tools into curriculum delivery, supporting teaching staff with technology adoption across classroom environments.
